

MONOPACK SPORTS FLOOR SYSTEM

The **MONOPACK** Sports Floor System is a unique combination of coatings and cleaning products for use on timber sports floors.

The system gives a slip resistant surface according to AS/NZ 4586-1999 standard.

The system is built around the use of **MONOPACK Sports Floor Finish**, an oil modified clear polyurethane coating applied as a sealer-finish to the prepared timber floor, and is available in both solvent borne and water borne versions. The coating is easy to apply, there is minimal tendency to edge bonding of boards, and the resultant surface is hard wearing and is easy to maintain using **MONOPACK Sports Floor Cleaner**.

The system also provides hard wearing coloured court markings by use of **MONOPACK Line Marking Paint** which is applied between the coats of MONOPACK Sports Floor Finish to form a tough compatible matrix.

The **MONOPACK** Sports Floor System is suited to both new cushioned and solid timber floors, as well as the restoration of previously coated floors.
